AQ3.5: Activity Questions 5 - Not Graded

This assignment will not be graded and is only for practice.
Level 1

1 point
Choose the set of correct options.

- [ ] The set $\{(1,2,3),(4,5,6),(7,8,9)\}$ is linearly dependent.
- [ ] The set $\{(1,2,3),(4,5,6),(5,7,9)\}$ is linearly independent.
- [ ] The set $\{(1,2,3),(0,5,6),(0,0,9)\}$ is linearly independent.
- [ ] The set $\{(1,2,3),(0,0,6),(0,0,9)\}$ is linearly independent.

No, the answer is incorrect.

If $ad - bc = 0$ then which of the following options are true?

- [ ] The set $\{(a,b),(c,d)\}$ is linearly dependent in R^2.
- [ ] The set $\{(a,c),(b,d)\}$ is linearly dependent in R^2.
- [ ] The set $\{(1,0,0),(0,a,b),(0,c,d)\}$ is linearly dependent in R^3.
- [ ] The set $\{(1,0,0),(0,a,c),(0,b,d)\}$ is linearly dependent in R^3.

No, the answer is incorrect.

Assume the set $\{(a_1, b_1, c_1), (a_2, b_2, c_2), (a_3, b_3, c_3)\}$ {(a1, b1, c1), (a2, b2, c2), (a3, b3, c3)} is given to be linearly independent and consider the following system of linear equations

$$a_1 x + b_1 y + c_1 z = 1$$
$$a_2 x + b_2 y + c_2 z = 2$$ a1x + b1y + c1z = 1a2x + b2y + c2z = 2a3x + b2y + c3
$$a_3 x + b_2 y + c_3 z = 3.$$

z = 3.

If $AX = b$ AX = b is matrix representation of the above system of linear equations, where $X = \begin{bmatrix} x \\ y \\ z \end{bmatrix}$ X = [xyz], then which of the following option(s) is(are) true?

- ☐ The system of linear equations has a unique solution.
- ☐ The system of linear equations has no solution.
- ☐ The system of linear equations have infinitely many solutions.
- ☐ The coefficient matrix A A is invertible.
- ☐ The coefficient matrix A A is not invertible.
- ☐ Any one of the above options cannot be concluded using the given information.

No, the answer is incorrect.

Let the set $\{(a, b), (c, d)\}$ be a linearly independent subset of R^2. Choose the set of correct options.

- [ ] $\{(a, b, 0), (c, d, 0)\}$ must be a linearly independent subset of R^3.
- [ ] $\{(a, b, 0), (c, d, 0), (0, 0, 1)\}$ must be a linearly independent subset of R^3.
- [ ] $\{(a, b, 0), (c, d, 0), (1, 0, 0)\}$ must be a linearly independent subset of R^3.
- [ ] $\{(a, b, 0), (c, d, 0), (0, 1, 0)\}$ must be a linearly independent subset of R^3.

No, the answer is incorrect.

Each column of an $n \times n$ matrix A can be thought of as vectors in R^n. If a set S consists of all the column vectors of A, then which of the following is(are) true?

- [ ] S is always linearly independent.
- [ ] S is linearly independent if $det(A) \neq 0$.
- [ ] S is linearly independent if $det(A) = 0$.
- [ ] If $det(A) = 1$, then S is linearly independent.

No, the answer is incorrect.

Suppose it is known that the three vectors $v_1 = \begin{bmatrix} a \\ b \\ c \end{bmatrix}, v_2 = \begin{bmatrix} d \\ e \\ f \end{bmatrix}, v_3 = \begin{bmatrix} g \\ h \\ i \end{bmatrix}$ are linearly dependent in R^3. Which of the following is correct?

- [ ] Some linear combination of a, b, c must be 0.
- [ ] Some linear combination of a, d, g must be 0.
- [ ] Some linear combination of d, e, f must be 0.
- [ ] Some linear combination of c, f, i must be 0.

No, the answer is incorrect.
