

AQ10.2: Activity Questions 2 - Not Graded

This assignment will not be graded and is only for practice.

Level 1:

Consider a function $f: \mathbb{R}^2 \rightarrow \mathbb{R}$ defined as:

$$f(x, y) = \begin{cases} x^2 \sin \frac{1}{x} + y & \text{if } x \neq 0 \\ 0 & \text{if } x = 0. \end{cases}$$

- **Statement 1:** f_y is continuous at the origin.
- **Statement 2:** f_x is continuous at the origin.

Enter the number of correct statements.

No, the answer is incorrect.

1 point

A function $f: \mathbb{R}^2 \rightarrow \mathbb{R}$ satisfies that $f_x(x, y) = c$ and $f_y(x, y) = k$ of all points of $\mathbb{R}^2$, where c and k are some constants, then which of the following option(s) is (are) true?

☐

The tangent line exists at any point of $\mathbb{R}^2$ in any direction.

☐

The tangent lines at the origin do not lie on a plane.

☐

There exist points in $\mathbb{R}^2$ for which tangent points in all directions do not exist.

☐

$f(x, y)$ can be $f(x, y) = cx + ky + \alpha$, where α is any real number.

No, the answer is incorrect.

Consider $f: \mathbb{R}^2 \rightarrow \mathbb{R}$ and suppose partial derivatives of $f(x, y)$ with respect to x and y are continuous at a point (a, b) . Then which of the following option(s) is (are) true?

☐

$$f_x(a, b) = \lim_{(x, y) \rightarrow (a, b)} f_x(x, y) = f_x(a, b)$$

☐

$$f_y(a, b) = \lim_{(x, y) \rightarrow (a, b)} f_y(x, y) = f_y(a, b)$$

☐

$$f_x(a, b) \neq \lim_{(x, y) \rightarrow (a, b)} f_x(x, y)$$

☐

$$f_y(a, b) \neq \lim_{(x, y) \rightarrow (a, b)} f_y(x, y)$$

No, the answer is incorrect.
