

AQ9.3: Activity Questions 3 - Not Graded

This assignment will not be graded and is only for practice.

Directional Derivatives:

Level 1:

1 point

Which of the following statements is(are) true?

☐

The directional derivative of $f(x, y)$ at a point (a, b) in the direction of a unit vector u is a non negative real number.

☐

The directional derivative of any function is always a scalar.

☐

The rate of change of $f(x_1, x_2, \dots, x_n)$ in the direction of a unit vector

$u = (a_1, a_2, \dots, a_n)$ is called the directional derivative of f in the direction of u .

☐

The directional derivative of any function is a vector because it is dependent on the direction of a unit vector.

No, the answer is incorrect.
