

AQ8.5: Activity Questions 5 - Not Graded

This assignment will not be graded and is only for practice.

Level 1

1 point

Choose the correct options.

☐

Let $T: R^2 \rightarrow R^2$ be a linear transformation, where R^2 is the inner product space with respect to the dot product. Then $Tu \cdot Tv = u \cdot v$.

☐

Let $T: R^2 \rightarrow R^2$ be an orthogonal linear transformation, where R^2 is the inner product space with respect to the dot product. Then $Tu \cdot Tv = u \cdot v$.

☐

Let $T: R^2 \rightarrow R^2$ be a linear transformation, where R^2 is the inner product space with respect to the inner product given by $\langle a, b \rangle = 2a_1b_1 + 5a_2b_2$. Then $\langle Tu, Tv \rangle = \langle u, v \rangle$.

☐

Let $T: R^2 \rightarrow R^2$ be an orthogonal linear transformation, where R^2 is the inner product space with respect to the inner product given by $\langle a, b \rangle = 2a_1b_1 + 5a_2b_2$. Then $\langle Tu, Tv \rangle = \langle u, v \rangle$.

No, the answer is incorrect.

1 point

If A is the matrix representation of an orthogonal transformation $T: R^n \rightarrow R^n$, then choose the set of correct statements.

☐

$$AA^T = I \quad A^T A = I$$

☐

$$A = A^T \quad A = A^T$$

☐

AA^T is an upper triangular matrix

☐

AA^T is a lower triangular matrix

☐

$$A^T = A^{-1} \quad A^T = A^{-1}$$

☐

$$A^T = -A^{-1} \quad A^T = -A^{-1}$$

☐

A^{-1} does not exist

☐

A^{-1} is also an orthogonal matrix

No, the answer is incorrect.

Score: 0

Accepted Answers:

$$AA^T = I \quad AAT = I$$

AA^T is an upper triangular matrix

AA^T is a lower triangular matrix

$$A^T = A^{-1} \quad AT = A^{-1}$$

$A^{-1}A^{-1}$ is also an orthogonal matrix

1 point

If AA is the matrix representation of an orthogonal transformation $T: R^n \rightarrow R^n$, then choose the set of correct statements.

☐

The column vectors of AA are orthogonal but not orthonormal.

☐

The column vectors of AA are orthonormal.

☐

The row vectors of AA are orthogonal but not orthonormal.

☐

The row vectors of AA are orthonormal.

No, the answer is incorrect.

Score: 0

Accepted Answers:

The column vectors of AA are orthonormal.

The row vectors of AA are orthonormal.

Level 2

1 point

Consider the orthogonal set $B = \{(1, 1, 1), (-1, 1, 0)\}$ in R^3 . Find a third vector in R^3 which is orthogonal to both the vectors in B .

☐

$(1, 1, -2)$

☐

$(1, -1, 2)$

☐

$(-1, 1, -2)$

☐

$(-1, -1, -2)$

No, the answer is incorrect.
