

AQ8.4: Activity Questions 4 - Not Graded

This assignment will not be graded and is only for practice.

Level 1

Consider an ordered basis $\gamma = \{b_1, b_2, b_3\}$ of the inner product space R^3 with respect to the dot product, where $b_1 = (1, 2, 3)$, $b_2 = (1, 1, 1)$ and $b_3 = (0, 2, 1)$. Let $\beta = \{a_1, a_2, a_3\}$ be the orthonormal basis which is obtained using the Gram-Schmidt process from the basis γ . Use this information to answer the questions 1 and 2.
